

**Delaware County**  
Broadband RFP Question/Answers

#	Question	Response
1	Is there an electronic map (KMZ/KML file) of the areas in need?	Requested KMZ/KML files from Lit and provided to requesting party. This data is available to other parties upon request.
2	Is RDOF eligible for inclusion in proposals?	The County's focus for this RFP is underserved and unserved areas, and the County would certainly want to know if a respondent is already planning to serve an area within the County under RDOF.
3	The "Project Overview" mentions the commissioners' may be willing to contribute ARPA funds. How much funding is allocated to the project? How much can the commissioners contribute?	With respect to ARPA funding, currently the County has the potential to make available ARPA funding amounts totaling up to \$5.3M to selected responsive proposer(s) to the RFP.
