BROADBAND EXPANSION PROJECT

“...my home just happens to fall in a very dead zone for any good connection. To be honest, with my location, I did not think we would have anything anytime soon. The gentleman who came out to get us set up from Consolidated Cooperative Fiber said that Delaware County wrote a grant to have the fiber installed.

I just wanted to write and thank whoever took the time to write and implement the grant! Our family is very thankful to now be able to work and learn at home when needed.”
